

Refurbished Carbon Dioxide Scrubber

Like new, at a fraction of the price.

Tuff carbon dioxide scrubbers are built to take the demands of your controlled atmosphere (CA) storage. For a limited time, you can integrate one into your CA storage system at a fraction of the cost. A refurbished CO₂ Scrubber from Tuff boasts the same features as a brand new one, but it costs up to 60% less.

In most cases, our CO₂ scrubbers operate 15-30% more efficiently than the competition. Comparatively, our scrubbers add the least amount of oxygen per scrub cycle, and they have zero pressure effect on the CA rooms.

The refurbished Tuff CO₂ scrubber boasts all the advantages of a new one at an incredibly affordable price.

Key Features

- Comes with a 2-year warranty
- Has same life expectancy as brand new equipment (10 years on absorption media)
- Factory refurbished and tested
- Save up to 60% on cost as opposed to buying new
- Produces virtually zero oxygen feedback
- Capable of controlling oxygen and nitrogen levels by interfacing with a nitrogen generator and adding oxygen via valving
- VFD-driven centrifugal blower to reduce heat and save energy
- Automatically tests rooms for leaks

Options

TCS-950E
